

AARON JOHNSON

SOFTWARE ENGINEER III

 347.786.0266  aaron.johnson1031@gmail.com  ajfs.me  aj-swe@linkedin

ABOUT ME

Experienced Frontend Engineer with 10+ years building high-impact web applications, specializing in React, TypeScript, Next.js/Vite, and modern design systems. I focus on performance, clarity, and leverage—shipping interfaces that make complex financial workflows faster and more efficient. I enjoy running lightweight experiments, reading the data, and iterating quickly, while mentoring engineers and improving the frontend stack (components, testing, tooling) for long-term velocity.

EXPERIENCE

SOFTWARE ENGINEER III JPMORGAN CHASE 2021 - Present

Build and maintain enterprise web applications with React, TypeScript, Next.js, and Tailwind CSS, delivering fast, responsive, accessible UIs for internal finance and operations teams.

Translate Figma designs into pixel-perfect interfaces with polished UX details, thoughtful micro-interactions, and motion.

Design reusable single-page layout frameworks that encapsulate navigation, AG Grid tables, shared business logic, and configuration-driven patterns to accelerate feature delivery.

Architect scalable frontend state management with Redux Toolkit, RTK Query, Context API, and Jotai, keeping data fetching, caching, and UI state predictable.

Modernize frontend infrastructure using Webpack, CRACO, monorepo strategies, Module Federation, and single-spa to support scalable micro-frontend architecture.

Write unit and integration tests with Jest, helping raise test coverage to 70%+ and reduce production regressions.

Integrate frontend builds and automated validation into Jenkins CI/CD pipelines to improve release reliability and developer workflow.

Partner with product, design, and engineering teams to scope frontend projects, refine UX flows, break work into iterations, and ship incremental business value.

Mentor junior engineers through code reviews, pair programming, and documentation while promoting best practices in TypeScript, accessibility, performance, and component API design.

FRONTEND / INTERACTIVE DEVELOPER POST STUDIOS 2018 - 2021

Built interactive marketing microsites and rich media experiences with JavaScript, HTML5, CSS3, and animation libraries (GSAP/WebGL), ensuring smooth 60fps animations and fast load times across desktop and mobile.

Collaborated with designers to translate Figma/Adobe CC comps into pixel-accurate implementations, often iterating on motion and micro-interactions to match brand quality bars.

Created reusable UI patterns and internal templates that reduced development time for repeat campaign types.

CREATIVE DESIGNER NEXXEN (FORMERLY TREMOR VIDEO) 2013 - 2018

Developed high-performance interactive ad units and landing experiences using JavaScript, HTML5, and CSS, optimizing bundle size and network usage to reduce ad load time by ~40%.

Worked closely with product, design, and account teams to ship campaigns under tight deadlines, debugging cross-browser issues and ensuring accessible, responsive layouts.

Helped standardize internal frontend tooling and best practices, improving reliability and consistency across a large campaign surface area.

EDUCATION

COMPUTER SCIENCE
BLOOM INSTITUTE OF TECHNOLOGY
DSA, Modern development tech stack

A.S., DIGITAL MEDIA COMMUNICATIONS
GIBBS COLLEGE
History of design & standardized user-centric development practices

SKILLS & PROFICIENCIES

FRONTEND: React, TypeScript, JavaScript (ES6+), Next.js, Vite, Redux Toolkit, RTK Query, Tailwind CSS, CSS-in-JS, Storybook, AG Grid

ARCHITECTURE & DX: Design systems, component libraries, state management patterns, performance optimization, accessibility, CI/CD (Jenkins, CircleCI)

BACKEND & DATA: Node.js, REST APIs, FastAPI, SQL (Postgres, MySQL), basic AWS (S3, EC2)

TESTING & QUALITY: Jest, Cypress, unit & integration testing, visual/UI regression concepts

PRODUCT & COLLABORATION: UX prototyping (Figma), working in product pods, data-informed iteration, mentoring, documentation
